12. The most effective part of this course was:

Teacher feedback after assignments
Being able to have more study time, instead of sitting in a class.
The levels of learning incorporated in the course.
The discussion postings really helped me to own the material. I might have understood the material before, but having to explain it to others helped me to "know" the material.
I was able to manage my own time to complete this course. Ms. King was very helpful with questions raised.
that I learned all about nutrition, health and safety for children and at the convenience of my own home. Everything I have learned will help me greatly in the field of teaching. Thank you Ms. Paula Burkett!
His notes
I learned more than I thought possible. My instructor found a way to make history exciting and interesting.
The study materials Mrs. Carlile provided.
Interaction with the instructor and other students.

The use of online sites that the instructor recommended.
Teacher's obvious interest in class and ensuring that students understood content and requirements.
All of the help that Ms. King demonstrated and in a timely manner.
Learning that animation takes up a great deal of time. It is hard work.
The format of the on-line course was easy to follow, and Ms. Burkett was always answered my question promptly if I had a question. The information I learned in this course will help me in my professional career in the future.
I had an instructor who promptly answered any question I had, and the on-line format was easy and accessible.
Blogs

13. This course could be improved by:

I cant think of anything
Less time consuming work.
I don't think this course needs any improvement. Everything I needed was on-line and if I had any questions, the instructor was very prompt in responding. I would definitely take another VCT course!
It's great no improvements please
Reminding students that the study materials from StudyMate correlate with the tests.
Adding more study materials, such as practice tests, that are more like the actual tests.
The text book was not really needed.
Providing feedback, early on, of all submissions. This would assure the student of the quality of their work and if they were meeting the expectations of the teacher.
Having hands on in classroom instructor.
I didn't see a need for improvement in this on-line course.
I don't think the on-line course needs any improvement.
Online weekly quizzes.
