8:00 a.m. – 2:00 p.m., AC

Electrical Safety and Tools

1 week, 48 hours, \$350

(ELPT 1021 – Introduction to Electrical Safety and Tools)

This course covers line worker safety rules and regulations. Topics include the selection, inspection, use, and maintenance of common tools used by line workers.

*Henderson Campus:***KC477052.302 093Q** M/T/W/R/F, Apr. 5

8:00 a.m. – 6:00 p.m., RCEC

Utility Vehicle Operations

1 week, 16 hours, \$175

(CVOP 2001 – Federal Motor Carrier Safety Regulations)

This course is an overview of Federal Motor Carrier Safety Regulations and their application to the commercial vehicle operator. Topics include driver's record of status, physical requirements, drug and/or alcohol testing, safety requirements of equipment, and defensive driving. Students will practice driving a utility truck and driving tests will be scheduled at Henderson DPS during this week. Students must have their CDL Class A license by week nine, Live line Safety.

*Henderson Campus:***KC557140.301 093Q** M/T/W/R, Apr. 12

8:00 a.m. – 12:00 p.m., AC

Safety Regulations

1 week, 48 hours, \$350

(OSHT 1001 – Introduction to Safety and Health)

This course introduces basic concepts of safety and health. Topics include general OSHA compliance safety training certification and 1910.269.

*Henderson Campus:***KC499627.302 093Q** M/T/W/R/F, Apr. 19

8:00 a.m. – 6:00 p.m., RCEC

Live Line Safety

1 week, 48 hours, \$350

(LNWK 1091 – Special Topics in Line worker)

This is a study of cover-up procedures and safety requirements for work on energized electrical circuits. Topics include use and care of insulating equipment and tools, minimum approach distances, nominal voltage recognition, system protection and operation basics, and equipment operation.

*Henderson RCEC:***KC477044.302 093Q** M/T/W/R/F, Apr. 26

8:00 a.m. – 6:00 p.m., RCEC

Distribution Operations

1 week, 48 hours, \$350

(LNWK 1041 – Distribution Operations)

This course is a study of the theoretical and practical operation of electric utility distribution systems. Topics include the basics of single phase transformers, regulators, reclosers, capacitors, fusing, and overhead and underground distribution systems.

*Henderson RCEC:***KC477043.301 093Q** M/T/W/R/F, May 3

8:00 a.m. – 6:00 p.m., RCEC

Industrial Electrical Technology Certificate

Industrial Electrical Technology Certificate Information Session

You are invited to a free information session to learn more about the Industrial Electrical Technology Certificate and other electrical courses offered by Kilgore College. You'll meet the instructors, review the course materials, and get your questions answered. Most importantly, you'll find out how these courses can assist you with your career objectives, all without cost or obligation.

For reservations or for more information, please call 903-983-8288.

Date: Mon., Jan. 18, 2010

Time: 6:30 p.m.

Place: Bert E. Woodruff Adult Education Center in Kilgore – Room 220

Required Prerequisites

Electrical Calculations

2 weeks, 36 hours, \$275

(ELPT 1015 – Electrical Calculations I)

This course covers the mathematical applications utilized to solve problems in the electrical field. Topics include fractions, decimals, percentages, simple equations, ratio and proportion, and unit conversions. Emphasis will be placed on how to calculate the size of conductors, boxes, raceways, and overcurrent protective devices for branch circuits supplying electrical equipment and building services and how to compute the size of branch circuits, feeders, and equipment for motors. **Textbook required.**

Kilgore Campus:

KC477035.300 093Q M/T/W/R/F., Jan 11

8:00 a.m.-12:00 p.m., AC220

Electrical Blueprint Reading

2 weeks, 36 hours, \$275

(DFTG 1023 – Electrical Blueprint Reading)

This course is an overview of electrical blueprint reading as it pertains to the applicable sections of the 2008 National Electric Code. **Textbook required.**

Kilgore Campus

KC477025.307 093Q M/T/W/R/F, Jan 11

1:00-5:00 p.m., AC

Hydraulics School

3 weeks, 12 hours, \$225

(HYDR 1000 – Fluid Power I)

This course is an overview of fluid power, covering principles, major components, and basic circuitry. It is designed to introduce the beginning student to fluid power concepts and at the same time show how fluid power relates to areas of manufacturing like metal forming, plastics, basic metals, and material handling. **Textbook is required.**

Longview: TBA

KC450006.300 093Q Tue., Feb. 2

8:00 a.m.-12:00 p.m.

Certificate Courses

Industrial Electricity

1 week, 36 hours, \$275

(IEIR 1014 – Basic Industrial Electricity)

This course covers the theory and application of electrical energy. Topics include AC and DC theory, voltage, current, resistance, power, electrical values for series, parallel and combination circuits, electrical generation, transmission, and distribution and switching. **Textbook required.**

Kilgore Campus

KC800110.301 093Q M/T/W/R/F, Mar. 1

8:00 a.m. – 5:00 p.m. AC220

Electrical Control Wiring

1 week, 24 hours, \$225

(ELPT 1002 – Introduction to Electrical Controls)

This course covers the general principles of electrical controls and their components in the electrical power and air conditioning industries. Topics include reading electrical schematics; identifying industrial switches and pilot devices; and reviewing NEC. **Textbook required.**

Kilgore Campus:

KC477036.301 093Q M/T/W/R, Mar. 8

8:00 a.m. – 2:00 p.m., AC220

Electric Motors

1 week, 48 hours, \$350

(IEIR 1006 – Electric Motors)

This hands-on course covers the fundamentals of single phase and three phase alternating current motors and direct current motors including operating principles, characteristics, application, selection, installation, maintenance, troubleshooting and NEC review. **Textbook required.**

Kilgore Campus:

KC800108.301 093Q M/T/W/R/F, Mar. 15

8:00 a.m. – 6:00 p.m., AC220

Industrial Wiring

2 weeks, 64 hours, \$450

(ELPT 1057 – Industrial Wiring)

This hands-on course covers wiring methods using NEC guidelines for industrial installations. Topics include computation of circuit sizes, overcurrent protection for the installation of branch circuits, feeders, and service entrance conductors, proper installation of wiring devices, grounding methods, and conduit bending. Emphasis will be placed on safety requirements.

Textbook required.*Kilgore Campus:***KC477030.300 093Q** M/T/W/R/F, Mar. 22

8:00 a.m. – 3:30 p.m. AC220

National Electric Code (NEC)

1 week, 16 hours, \$150

(ELPT 1001 – Electrical Code)

This course is a study of the electrical requirements specified in the National Electric Code (NEC) Topics will include the minimum requirements for approval of electrical installations.

Textbook required.*Kilgore Campus:***KC477037.300 093Q** M/T/W/R, Apr. 5

8:00 a.m. – 12:00 p.m., AC

Electro-Hydraulics

1 week, 24 hours, \$225

(HYDR 1091 – Special Topics in Hydraulics Technology/Technician)

This course introduces participants to the electrical control of hydraulic circuits. Topics include a review of hydraulic principles and fundamentals, electrical theory related to circuit design, amplifier theory and control concepts, and proportional, servo, and electro-hydraulic valve systems. **Textbook required.**

*Kilgore Campus:***KC465008.300 093Q** M/T/W/R, Apr. 12

8:00 a.m. – 2:00 p.m., AC

Programmable Logic Controllers

1 week, 24 hours, \$225

(ELPT 1003 – Programmable Logic Controllers)

This course covers basic hardware and software applications for industrial Programmable Logic Controllers (PLC). Topics include power supplies, discrete Input/Output (IO) modules, programming devices, processors, basic logic elements, timers, and counters. **Textbook required.**

*Kilgore Campus:***KC477032.300 093Q** M/T/W/R, Apr. 19

8:00 a.m. – 2:00 p.m., AC220

Electrical Power Distribution

1 week 48 hours, \$350

(ELPT 2039 – Electrical Power Distribution)

The course covers the design, operation, and technical details of modern power distribution systems including generating equipment, transmission Lines, plant distribution, and protective devices. Topics include calculations of fault current, system load analysis, rates, and power economics. **Textbook required.**

*Kilgore Campus:***KC477033.301 093Q** M/T/W/R/F, Apr. 26

8:00 a.m. – 6:00 p.m., RCEC

Industrial Automation

1 week, 48 hours, \$350

(ELPT 1019 – Special Topics in Electrical and Power Transmission Installer, General))

This course covers electrical control systems, applications, and interfacing utilized in industrial automation. **Textbook may be required.**

Kilgore Campus:

KC477039.300 093Q M/T/W/R/F, May 3

8:00 a.m. – 6:00 p.m., AC220

Troubleshooting Electrical Systems

1 week, 24 hours, \$225

(EECT 2043 – Troubleshooting and Maintenance)

This course covers the application of troubleshooting techniques to correct electrical system problems. **Textbook may be required.**

Kilgore Campus:

KC800103.300 093Q M/T/W/R, May 10

8:00 a.m. – 2:00 p.m., AC220

Industrial Skills

Measurement Techniques

4 weeks, 16 hours, \$125

(MCHN 1042 – Machine Shop Mathematics)

This course focuses on the selection and use of precision measurement tools in industrial settings. Emphasis will be placed on measurement techniques using metric and inch micrometers, dial calipers, and other precision devices. Topics include common methods of measurement conversion; determining the degree of precision measurement required; and converting English numbers to metric numbers, and metric to English.

Kilgore Campus:

KC479582.302 093Q Mon./Wed., Feb. 22
6:30-8:30 p.m., AC

Printreading for Industry

4 weeks, 24 hours, \$175

(DFTG 1023 – Blueprint Reading for Specific Industries)

This course is a study of industrial blueprints with emphasis placed on terminology, symbols, graphic descriptions, procedures, and industry standards. Emphasis will be placed on interpretation of plans and drawings used by various industries. **Textbook required.**

Kilgore Campus:

KC479559.306 093Q Tue./Thur., Feb. 23
6:30-9:30 p.m., AC

Shop Math

8 weeks, 24 hours, \$175

(MCHN 1042 – Machine Shop Mathematics)

This course covers applied mathematics required for the machine trades occupation. Topics include measurement, whole numbers, mixed numbers, fractions, decimals, and selected algebra, geometry, and trigonometry applications used in machine shop employment. Emphasis will be placed on defining the use of formulas and identifying conversion methods of numbering systems. **Textbooks required.**

Kilgore Campus:

KC479579.303 093Q Tue., Feb 23
6:30-9:30 p.m., AC

Machine and Metal Trades

Machine and Lathe Fundamentals

12 weeks, 64 hours, \$450

(MCHN 1038 – Basic Machine Shop I)

This course focuses on machine shop theory and terminology, shop math applications, basic bench work and part layout using a variety of common measuring tools, engine lathe components, cutting speeds, basic lathe set up, metal removing operations such as turning, facing, drilling, grooving, and turning on center, threading, and machine maintenance. Emphasis will be placed on shop safety, housekeeping and preventive maintenance. **Textbook required.**

Kilgore Campus:

KC479591.300 093Q Mon., Feb. 15

6:00-10:00 p.m., AC MS
