

Optical Gas Imaging Technician

Sphere 3 Environmental, Inc. currently has an open position for an Optical Gas Imaging Technician based out of its Longview, Texas office. This position will be full-time with benefits. The successful applicant will travel to oil and gas facilities and conduct leak detection surveys utilizing an Optical Gas Imaging infrared camera.

Responsibilities

- Utilize an Optical Gas Imaging infrared camera to inspect outdoor piping and equipment associated with oil and gas production facilities, midstream pipeline facilities, and gas plants.
- Conduct GPS field data collection and assist with other projects as needed.
- Approximately 90% of the time will be spent traveling and conducting field inspections away from the office for projects in Texas, New Mexico, Louisiana, and Oklahoma.
- Will communicate findings with Sphere 3 managers and client representatives both verbally and in written reports.

Minimum Qualifications

- Associates Degree in an Environmental or Safety related field of study.
- Must have a clean driving record.
- The successful candidate must complete and pass a pre-employment drug test and maintain a drug-free status with our substance abuse policy that includes random drug testing.
- Ability to work in the field and office environment.
- Must have strong written and verbal communication skills.
- Must be able to travel, work outside in extreme heat or cold weather conditions, and safely conduct the physical aspects of outdoor facility inspections.
- Must be able to comprehend, follow, and apply a variety of safety procedures and requirements.
- Interact in a positive and professional manner with clients and other staff.
- Experience with Optical Gas Imaging is a plus, but training will be provided.
- Familiarity with oil and gas production equipment is also a plus.
