Local toxicology laboratory performing testing on approved specimens is seeking a full time Sample Processor.

All duties listed below will be under the direction of the Laboratory Manager and must possess both experience and education in order to proficiently perform the necessary duties.

M-F 8-5 Pay DOE

Duties:

- Responsible for all specimen processing
- Perform only tests which are approved by the Laboratory Director (CLIA-waived) and for which they have been trained, and performed proficient testing if necessary
- Must follow the laboratory's procedures for specimen handling and processing, test analysis, reporting, temperatures, humidity and maintain records
- Adhere to the laboratory's qc policies and document all qc activities as directed by the Laboratory Manager
- Follow the laboratories established corrective action policies and procedures whenever systems are not within the laboratories established acceptable limits of performance
- Identify problems that may adversely affect test performance or reporting of test results. Must correct the problem immediately and notify the laboratory manager or the laboratory technical personnel
- Perform other duties as required per Laboratory Manager

Requirements:

- Associates in Laboratory Science
- Ability to exercise initiative, problem solving and decision making
- Ability to identify problems, make recommendations and implement solutions
- Ability to establish priorities and coordinate activities of processors

Physical Requirements/Demands:

- Requires full range of body motion, eye-hand coordination and manual dexterity.
- Normal range of hearing and eyesight.
