STUDENT WORKER
TEXAS A&M AGRILIFE RESEARCH AND EXTENSION CENTER
OVERTON, TEXAS
AVAILABLE IMMEDIATELY

Student would work on the Ornamentals Research Project at the Overton Center. The work would be primarily with bedding plants and roses. The job would involve a lot of outdoor field work, but also some greenhouse work. Student would have the opportunity to learn about different types of farm equipment and about ornamental plant production and utilization. The work would also include things like weeding, watering, and fertilizing as integral parts of plant growth and performance. The Overton Center is a part of the Texas A&M University System and is one of the off-campus Research and Extension Centers located across the state. Equal Opportunity Employer.
