

Infectious/Communicable Disease

Infectious/Communicable Disease Policy

Approved by and date:

Board of Trustees 02/12/2018

Executive Leadership Team 01/18/2018

Policy:

Kilgore College actively promotes the good health, safety, and well-being of students and employees to such extent or degree as possible while prohibiting discrimination against persons afflicted with communicable diseases.

Communicable disease is defined as any condition which is transmitted directly or indirectly to a person from an infected person or animal through the agency of an intermediate animal, host, or vector, or through the inanimate environment. Communicable disease includes, but is not limited to: influenza; tuberculosis; conjunctivitis; infectious mononucleosis; acquired immune deficiency syndrome (AIDS), AIDS-related complex (ARC), positive HIV antibody status; hepatitis A, B, C and D; meningitis; community associated methicillin-resistant staphylococcus aureus (CA-MRSA); and sexually transmitted diseases.

General Procedures

Persons who know or who have reason to believe they are infected with a communicable disease have an obligation to conduct themselves in accordance with such knowledge in order to protect themselves and others.

Students and employees who have communicable diseases, whether symptomatic or not, will be allowed regular classroom and work attendance in a non-restrictive manner, as long as they are able to attend classes and/or work and do not pose a medically proven threat for transmission of the disease or condition. Therefore, when there is no medical justification for restricting the access of students and employees who have communicable diseases, they will be allowed access to all College facilities and services.

All medical information related to the communicable diseases of students and employees will be kept confidential and no person, group, agency, insurer, employer, or institution will be provided any medical information without the prior, specific written consent of a student or employee unless providing such information is required by state and/or federal law.

Bacterial Meningitis

Texas Education Code, §51.9192, Subchapter Z, establishes the requirement for bacterial meningitis

vaccination for certain students and identifies exceptions to that requirement. Typically, all entering students who are less than 22 years of age must show proof of having received a bacterial meningitis immunization or booster within the five-year period immediately preceding enrollment.

Sources for Additional Information

Information regarding communicable diseases is available from the campus nurse's office, located in the Parks Fitness Center. Students may contact the campus nurse by calling (903) 983-8632. Specific information regarding Bacterial Meningitis, a serious and potentially deadly disease, is also available in the Student Handbook.
