Longview, TX 75605

- Associate of Arts
- Associate of Arts in Teaching
- Associate of Science

PROGRAM DESCRIPTIONS

The Associate of Arts, Associate of Arts in Teaching and the Associate of Science degrees provide general academic curricula in university-parallel and pre-professional courses of study which enable students to enter as juniors at senior colleges or universities of their choice.

Automotive Technology: Students who graduate from this program can work as automobile and truck technicians for new car dealerships, fleet maintenance and repair shops. Many graduates go into business for themselves.

Culinary Arts: The Culinary Arts program prepares students for careers in the nation's second largest private sector business--food service.

Cosmetology: Cosmetology is the art and science of beautifying hair, skin and nails. The main goal of the Cosmetology program is to prepare students to pass the Texas Department of Licensing and Regulation examination.

Welding: Welding is the most common way of permanently joining metal parts. Heat is applied to the pieces to be joined, melting and fusing them to form a permanent bond. Because of its strength, welding is used to construct and repair ships, automobiles, spacecraft, and thousands of other manufactured products, and to join beams when constructing bridges, buildings and other structures.

Kilgore College-Longview program descriptions are available on the KC-Longview webpage:
